SUMMARY

Full stack web developer with hands on training from Fullstack Academy and practical experience building user focused applications in JavaScript, React, Node.js, Express, and PostgreSQL. Strong foundation in responsive UI development, REST APIs, authentication, Git based collaboration, and debugging workflows. Brings an operations and leadership background that strengthens problem solving, accountability, and systems thinking on collaborative engineering teams.

TECHNICAL SKILLS

Languages: JavaScript, HTML5, CSS3, SQL

Frameworks and Libraries: React, React Router, Node.js, Express.js

Databases: PostgreSQL

Developer Tools: Git, GitHub, VS Code, Vite, Command Line

Core Concepts: Responsive Design, DOM Manipulation, REST APIs, Authentication, Test Driven Development, Data Structures and Algorithms

Working Knowledge: Figma, Framer, ChatGPT, GitHub Copilot

TECHNICAL PROJECTS

Portfolio Web Applications

2025 to Present

Portfolio: franksmithlll.com

GitHub: github.com/frankbjj23

Isaac Wright Jr. | Advocacy and Attorney Website

GitHub: github.com/frankbjj23/isaac-wright-Jr *Technologies: HTML, CSS, JavaScript*

- Built a responsive public facing website to showcase attorney Isaac Wright Jr.'s work, advocacy, and media presence.
- Implemented a structured layout and interactive elements designed for clear storytelling and mobile friendly viewing.

Cutz By Casper | Barber Booking App

GitHub: github.com/frankbjj23/Cutz-By-Casper

Technologies: JavaScript, React, Node.js, Express.js, PostgreSQL

- Developing a booking focused web application to streamline customer scheduling and communication for a working barber.
- Building toward full stack functionality with database backed workflows and user interaction features.

Il Veliero Porticello | Paid Client Website and Digital Menu

Live: ilvelieroporticello.com | GitHub: github.com/frankbjj23/il-veliero-porticello

Technologies: Next.js, React, TypeScript, CSS, GitHub, Custom DNS

Contracted to transform photographs of the establishment's printed menu and venue into a responsive customer-facing website.

Extracted and organized menu content, recreated the nautical visual identity, and delivered Google Maps, direct review, custom-domain, and QR-code access.

Mariah and Jasien Wedding Page

GitHub: github.com/frankbjj23/Mariah-JasiensWedpage

Technologies: HTML, CSS, JavaScript

- Created a photo forward event page showcasing highlights and images in a clean, mobile friendly presentation.
- Organized content to improve readability, visual flow, and viewing across screen sizes.

Sturgis Options | Group Trip Planning App

GitHub: github.com/frankbjj23/Sturgis-Options

Technologies: JavaScript, React, Node.js, Express.js, PostgreSQL

- Built a trip planning tool to centralize housing options, links, and dates for group decision making.
- Implemented collaboration features including comments and voting supported by a backend enabled workflow.

PROFESSIONAL EXPERIENCE

Independent Master Trainer | Self Employed | New Jersey / New York

2019 to Present

- Designed structured programs using data driven progress tracking and goal analysis.
- Applied analytical thinking to monitor performance trends and adjust programming.
- Managed scheduling, client communication, and day to day operations independently.
- Used digital tools for scheduling, client tracking, and business workflow management.
- Built long term trust through consistency, accountability, and clear communication.

Owner / Operator | Eagle Holdings Corp | New York, NY

2018 to 2020

- Founded and operated a financial services company serving small and mid sized businesses.
- Designed and managed internal workflows, systems, and operational processes.
- Oversaw budgeting, compliance, vendor coordination, and client onboarding.
- Implemented business systems and reporting workflows to improve visibility and execution.
- Solved operational inefficiencies through structured problem solving and process improvement.
- Built long term client relationships through clear communication and accountability.

Chief Operating Officer | Premier Capital | Brooklyn, NY

2015 to 2018

- Directed day to day operations for a high volume financial services organization.
- Managed and mentored teams while implementing performance tracking workflows.
- Improved operational efficiency through structured reporting and process optimization.
- Partnered with executive leadership to plan and execute organizational strategy.
- Led internal systems and reporting processes that improved accountability, tracking, and decision making.

EDUCATION

Fullstack Academy | Software Engineering Bootcamp

Graduated March 2026

Immersive software engineering program focused on front end development, React, back end fundamentals, SQL databases, authentication, testing, data structures, algorithms, and practical application development.
