

Frank Smith III

FULL-STACK DEVELOPER | FIELD OPERATIONS SPECIALIST

Bergen County, New Jersey | frankbjj23@gmail.com | linkedin.com/in/franksmithiii23 | github.com/frankbjj23 | franksmithiii.com

PROFESSIONAL SUMMARY

Fullstack Academy graduate and full-stack developer with paid client delivery, community-service web development, and verified project work across responsive interfaces, APIs, authentication, relational data, custom domains, and deployment. Current field-operations work in water treatment adds practical experience with safety, documentation, troubleshooting, communication, and dependable systems.

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, HTML5, CSS3, SQL

Frameworks and Libraries: React, Next.js, React Router, Node.js, Express.js, Vite

Data and Services: PostgreSQL, Supabase, REST APIs, authentication

Tools and Practices: Git, GitHub, VS Code, responsive design, testing, technical documentation, deployment

SELECTED TECHNICAL PROJECTS

Il Veliero Porticello | Live Paid Client Website and Digital Menu

Technologies: Next.js, React, TypeScript, CSS, GitHub, custom DNS

ilvelieroporticello.com | GitHub

- Contracted to transform photographs of a printed menu and waterfront venue into a responsive customer-facing website.
- Extracted and organized menu content, recreated the nautical visual identity, and delivered Maps, review, QR-code, repository, and custom-domain access.

Cutz By Casper | Deployed Booking Platform

Technologies: Next.js, TypeScript, Tailwind CSS, Supabase, Stripe, Twilio

Live application | GitHub

- Developed a mobile-first booking application with scheduling, deposit checkout, messaging, and administrative workflows.
- Connected a service-business interface to database, payment, and communication systems.

Greater Expectation | Live Community Service Website

Technologies: Next.js, React, TypeScript, CSS, responsive design

greaterexpectation.org | GitHub | Project story

- Created and deployed a faith-centered ministry website as community service for Pastor Troy, a good friend and my pastor.
- Organized clear visitor paths for ministry information, messages, visits, and prayer resources while marking unconfirmed operational details as coming soon.

Jukebox Pro | Authenticated API Coursework

Technologies: Node.js, Express, PostgreSQL, JWT, bcrypt, Vitest, Supertest

GitHub | Technical notes

- Built a playlist API with account registration, password hashing, token authentication, protected user-owned routes, relational data, and API tests.

Book Buddy | React API Client Coursework

Technologies: JavaScript, React, React Router, Vite, REST API, CSS

GitHub | Workflow notes

- Built a React client for catalog search, account access, book reservations, returns, routing, and conditional user states.

PROFESSIONAL EXPERIENCE

Field Operations Specialist | Water Treatment Operations, Bergen County, New Jersey | Current role

- Support water-treatment field operations with attention to safety, monitoring, documentation, and dependable procedures.
- Troubleshoot operational issues, communicate observations clearly, and remain composed when systems require attention.
- Apply disciplined verification and practical problem-solving to both operational work and software projects.

Full-Stack Developer | Independent Project Development | 2025 - Present

- Build and deploy responsive web projects using JavaScript, TypeScript, React, Next.js, Node.js, Express, PostgreSQL, and Supabase.
- Delivered live paid-client and community-service websites and document project status through case studies and repository READMEs.
- Develop workflows involving APIs, authentication, relational data, booking, payments, notifications, and deployment where supported by each project.

Independent Master Trainer | Self Employed, New Jersey / New York | 2019 - Present

- Design structured programs using goal analysis, progress tracking, and clear communication.
- Manage scheduling, client communication, digital tracking, and daily operations independently.
- Build long-term trust through consistency, accountability, and clear expectations.

Owner / Operator | Eagle Holdings Corp, New York, New York | 2018 - 2020

- Managed business operations, workflow design, client onboarding, reporting, budgeting, and vendor coordination.
- Applied structured problem-solving to operational processes and day-to-day decisions.
- Built client relationships through clear communication and accountability.

Chief Operating Officer | Premier Capital, Brooklyn, New York | 2015 - 2018

- Directed daily operations and supported team accountability, communication, performance tracking, and internal reporting.
- Managed and mentored teams while implementing repeatable reporting and workflow practices.
- Partnered with executive leadership on organizational planning and execution.

EDUCATION

Fullstack Academy | Software Engineering Bootcamp | Graduated March 2026

Immersive software engineering program covering JavaScript, React, backend fundamentals, SQL databases, authentication, testing, data structures, algorithms, and application development.
